

**LONDON
TOOTH WEAR CENTRE®**

Are you worried about your teeth?

Have they become more sensitive?

Are they sharp or chipping at the edges?

Have you stopped smiling?

This could be related to acidic foods and drinks in your diet, stomach acid reflux or even grinding and clenching which often takes place at night.

Most often, it is a combination of problems and, as we all keep our teeth longer, such problems of tooth wear are on the increase.

There are many ways we can help you to protect your teeth.

Please contact us for further information.

Professor Andrew Eder BDS MSc MFGDP MRD FDS FHEA

Specialist in Restorative Dentistry & Prosthodontics
